

On the road booklet

A guide to buying your first car

This 32-page guide is jointly produced by the Chartered Trading Standards Institute, the vehicle information specialists HPI and the self regulatory body for the automotive sector Motor Codes Limited.

The national road safety strategy, Tomorrow's Roads - Safer for Everyone, calls for transport integration leading to a transport system that is safe, efficient, clean and fair and encourages greater use of alternatives to the car. Good progress has been made against targets, however, there are still some groups that remain at risk, including young drivers.

In our commitment to help young drivers be safer on our roads, the booklet encourages drivers to make better decisions about buying and maintaining their first car.

This customised booklet is available to order.
